Imres can offer solutions for all types of health programmes in the international relief market

## DIAGNOSTICS

To prevent diseases from spreading, it is critical to be equipped to perform a quick and thorough diagnosis in the potentially affected population. Imres offers a wide range of diagnostics ranging from urine test strips for glucose to various blood tests for malaria, HIV and hepatitis B.

## ONE-STOP-SHOP

Imres maintains sufficient stocklevels of diagnostics at all times. They are stored in our climate controlled, GDP certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a sufficiently long shelf life upon shipment. Our diagnostics are available for immediate shipment.

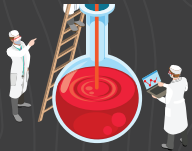

While more than 35 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

## THE IMRES DIFFERENCE

Over more than **35 years**, Imres has proved that we are a **reliable, efficient and trusted partner** in **healthcare strengthening programmes** in developing countries.

As an organisation, we are big enough to **make a difference**, but small enough to give our customers personal attention, and to care about the difference that we are making in lives and communities, and in our partners' health projects.

We have **offices and facilities** in the **Netherlands, Dubai, India, Canada, China** and the **Democratic Republic of Congo**.

Our **production areas** include a GMP room for secondary packing and a **Class D clean room** for primary packaging, as well as a **450 m<sup>2</sup> kit production area**. As a supplier, we do not make promises that we cannot keep. If we commit to a project and specific deliverables, it is because we really can deliver, as promised.

Like the projects that we are **proud** to be part of, Imres has heart. We are good at what we do, but we also feel good about what we do. We feel responsible for our partners' projects until each one ends **successfully**.

Then we move onto our **next challenge**; our next opportunity to turn humanitarian dreams into **concrete solutions** and **decisive action** that saves lives.
