## NON-COMMUNICABLE DISEASES

NCDs are increasingly becoming a primary cause of death worldwide. The healthcare systems in emergency situations or low resource settings are usually not geared to treat these diseases. The WHO has developed a standardized kit that fills the gap between the interagency emergency health kit and the treatment of NCDs in primary healthcare, the Non-Communicable Disease Kit.

## NON COMMUNICABLE DISEASE KIT (NCDK)

The non-communicable disease kit is a pre-packed, standardized medical kit for managing the most common non-communicable diseases like diabetes, cardiovascular diseases, chronic lung diseases, hypertension, cancer and selected mental health conditions. The NCDK contains oral medicines, renewables, medical devices and additional products. It serves ten thousand people for three months. The NCDK can be used in both emergency situations as well as in other low resource settings. Due to its modular set-up, it can be ordered as a complete kit, or the sub modules can be ordered independently.

## ONE-STOP-SHOP

Imres keeps a minimum quantity of basic NCD kits in stock at all times. The kits are assembled and stored in our GDP-certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a minimum of 12 months' remaining shelf life upon shipment.

While more than 35 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

## QUALITY

You want to be sure that the products for your health programme are of high quality. We do not take any chances when it comes to the quality of the kits and products that we supply. Imres has implemented an uncompromising set of quality controls, including a dedicated quality control department and independent testing in World Health Organisation (WHO) pre-qualified and ISO/IEC 17025:2005 certified laboratories for pharmaceutical products. Our stringent vendor rating system sees Imres visiting and screening vendors around the world. Manufacturers must achieve our high, internationally recognised standards, and those of our customers, and must adhere to the necessary quality control processes to qualify as an Imres vendor. All our products are screened, to ensure the quality of every item that we supply.

## THE IMRES DIFFERENCE

**+** Over more than **35 years**, Imres has proved that we are a **reliable, efficient and trusted partner** in **healthcare strengthening programmes** in developing countries.

**+** As an organisation, we are big enough to **make a difference**, but small enough to give our customers personal attention, and to care about the difference that we are making in lives and communities, and in our partners' health projects.

**+** We have **offices and facilities** in the **Netherlands, Dubai, India, Canada, China** and the **Democratic Republic of Congo**.

**+** Our **production areas** include a **GMP room** for secondary packing and a **Class D clean room** for primary packaging, as well as a **450 m<sup>2</sup> kit production area**. As a supplier, we do not make promises that we cannot keep. If we commit to a project and specific deliverables, it is because we really can deliver, as promised.

**+** Like the projects that we are **proud** to be part of, Imres has heart. We are good at what we do, but we also feel good about what we do. We feel responsible for our partners' projects until each one ends **successfully**.

**+** Then we move onto our **next challenge**; our next opportunity to turn humanitarian dreams into **concrete solutions** and **decisive action** that saves lives.
