WIDE RANGE OF PHARMACEUTICALS

At Imres we have the widest range of generic and branded pharmaceuticals for any health programme in the market. Our range is based on the WHO list of essential medicines, but goes much further than that. Our aim is to supply the right medicines, in the right form, at the right time for your health programme.

We distribute our own Imres range of high quality, affordable generic pharmaceuticals. They are specially developed for the hospital and pharmacy market and distributed worldwide. The "Distributed by Imres" products are labelled in English, French, Spanish and Portuguese. We always keep sufficient stock of this range for immediate dispatch. In addition to this, Imres has an extensive range of other generic and branded pharmaceuticals.

To safeguard the quality of our pharmaceuticals, we continuously have GMP audits conducted by our qualified pharmacists, along with re-analysis and contra-analysis of pharmaceuticals.

ONE-STOP-SHOP

Imres maintains minimum stock levels of pharmaceuticals at all times. These pharmaceuticals are stored in our climate controlled GDP-certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a sufficiently long shelf life upon shipment.

While more than 35 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

A COMPLETE MEDICAL SOLUTION IN A BOX

That is the essence of a medical kit. In this brochure, you will find an overview of our range of medical kits. If you need a solution for which there is no kit available yet, we can customise one for you.

Imres packs and distributes all types of emergency and medical kits, according to our customers' specific requirements. These range from simple to complicated kits, for a variety of purposes, assembled either from stock or specially developed and sourced for customers.

FAST & EFFICIENT

The best medicine is useless if it cannot get to where it is needed, when it is needed. We know that delays can cost lives, so our logistics solutions are designed for speed and efficiency. We hold sufficient stock of the most common medical kits. Our experienced logistics department can get stocked kits to any location in the world within 48 hours of receiving your order.

EXPERT SOURCING & FLEXIBILITY

Do you need a kit solution that is not readily available? Over the years Imres has composed many custom-made medical kits for various needs, in close collaboration with our customers. Our extensive database of quality suppliers and product combinations enables us to cater for every medical supply need that you may have. While more than 35 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

QUALITY

You want to be sure that the products for your health programme are high quality. We do not take any chances when it comes to the quality of the kits and products that we supply.

Imres has implemented an uncompromising set of quality controls, including a dedicated quality control department and independent testing in World Health Organisation (WHO) pre-qualified and ISO/IEC 17025:2005 certified laboratories for pharmaceutical products. Our stringent vendor rating system sees Imres visiting and screening vendors around the world. Manufacturers must achieve our high, internationally recognised standards, and those of our customers, and that they adhere to the necessary quality control processes to qualify as an Imres vendor. All our products are screened, to ensure the quality of every item that we supply.

PROVEN SOLUTION

An Interagency Emergency Health Kit (IEHK) Kit contains all the necessary medication and basic medical supplies for a population of 10,000 for three months. In a refugee camp with a population of 50,000, five IEHK kits provide the basic medical solution for the entire population; all conveniently packed in clearly marked boxes.

INTERAGENCY EMERGENCY HEALTH KIT

Art. Nr	Description
61825	Kit, Interagency Emergency Health, 2015, Basic unit, without anti-malarial module
61826	Kit, Interagency Emergency Health, 2015, Anti-malarial module for Basic unit
61827	Kit, Interagency Emergency Health, 2015, Supplementary unit: Medicines, without anti-malarial module
61830	Kit, Interagency Emergency Health, 2015, Supplementary unit: renewable supplies
61829	Kit, Interagency Emergency Health, 2015, Supplementary unit: equipment
61828	Kit, Interagency Emergency Health, 2015, Anti-malarial module for Supplementary Drugs unit
61831	Kit, Interagency Emergency Health, 2015, PEP module for Supplementary Drugs unit

IEHK COMPOSITION

The IEHK 2015 consists of two different sets of medicines and medical devices: A Basic Unit and a Supplementary Unit. Each IEHK is designed to serve 10,000 people for three months.

All units are packed in extra sturdy boxes to ensure its contents are secure, and each box is equipped with convenient carrying handles on the sides.

We hold sufficient stock of IEHK Kits to respond quickly to any crisis or emergency situation.

BASIC UNIT

The Basic Unit contains essential medicines and medical devices, and can be used by primary healthcare workers with limited training. It contains oral and topical medicines, and no injectables. To facilitate distribution to smaller health facilities on site, the quantities of pharmaceuticals and medical devices in the basic unit have been divided into 10 identical units, each for 1,000 people.

SUPPLEMENTARY UNIT

The Supplementary Unit contains additional essential medicines and medical devices, and is to be used only by professional health workers or physicians. It contains different pharmaceuticals and supplies to the Basic Unit and therefore the units, which complement each other, should ideally be used together.

The Supplementary Unit consists of three modules: the drugs module, the renewables module and the equipment module.

OPTIONAL MODULES

Optional anti-malaria modules are available for both the Basic Unit and the Supplementary Unit. The anti-malaria module for the Basic Unit consists of a combination therapy for the treatment of uncomplicated falciparum malaria, as well as malaria rapid tests.

The anti-malaria module for the Supplementary Unit consists of second line treatment injectable drugs. The Supplementary Unit also has an optional post-exposure prophylaxis (PEP) module. It contains medicines and diagnostics for first line treatment after potential exposure to HIV infection. These anti-malaria and PEP modules will only be included on specific request.

Imres's Emergency Reproductive Health (ERH) Kits have been designed primarily to provide priority reproductive health services to displaced populations without medical facilities, or where medical facilities are disrupted during a crisis. These kits contain essential drugs, supplies and equipment to be used for a limited period and a specific number of people.

Each of the Reproductive Health Kits responds to a particular reproductive health need, and contains supplies calculated for a precise number of people for a three-month period. The kits can be ordered separately as a "stand-alone" response to a particular situation.

Imres holds sufficient stock of ERH Kits to respond quickly to any crisis or emergency.

DIAGNOSTICS

To prevent diseases from spreading, it is critical to be equipped to perform a quick and thorough diagnosis in the potentially affected population. Imres offers a wide range of diagnostics ranging from urine test strips for glucose to various blood tests for malaria, HIV and hepatitis B.

ONE-STOP-SHOP

Imres maintains sufficient stocklevels of diagnostics at all times. They are stored in our climate controlled, GDP certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a sufficiently long shelf life upon shipment. Our diagnostics are available for immediate shipment.

While more than 35 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

THE IMRES DIFFERENCE

Over more than **35 years**, Imres has proved that we are a **reliable, efficient and trusted partner** in **healthcare strengthening programmes** in developing countries.

As an organisation, we are big enough to **make a difference**, but small enough to give our customers personal attention, and to care about the difference that we are making in lives and communities, and in our partners' health projects.

We have **offices and facilities** in the **Netherlands, Dubai, India, Canada, China** and the **Democratic Republic of Congo**.

Our **production areas** include a GMP room for secondary packing and a **Class D clean room** for primary packaging, as well as a **450 m² kit production area**. As a supplier, we do not make promises that we cannot keep. If we commit to a project and specific deliverables, it is because we really can deliver, as promised.

Like the projects that we are **proud** to be part of, Imres has heart. We are good at what we do, but we also feel good about what we do. We feel responsible for our partners' projects until each one ends **successfully**.

Then we move onto our **next challenge**; our next opportunity to turn humanitarian dreams into **concrete solutions** and **decisive action** that saves lives.
